Steps for Determining Close Contact and Quarantine in K-12 Schools

and STRUCTURED OUTDOOR SETTINGS

If yes to all of the below, the student is a close contact, regardless of proper mask use. If no to any, move to the next column.

LESS THAN 3 FEET

Was the student within 3 feet of another student with COVID-19?

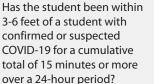

Has the student been within 3 feet of a student with confirmed or suspected COVID-19 for a cumulative total of 15 minutes or more over a 24-hour period?

If the answers to the questions above are both yes, the student is a close contact, regardless of whether the person was wearing a mask properly.

If yes to **all of the below**, the student is a close contact. If no to any, then the student is not a close contact.

WITHIN 3-6 FEET

Was the student within 3 to 6 feet of another student with COVID-19?

Were either of the two students wearing masks inconsistently, incorrectly, or not at all?

LESS THAN 6 FEET

is not a close contact.

Was the student or adult within 6 feet of someone with COVID-19?

If yes to all of the below, the person is a close contact,

regardless of proper mask use. If no to any, the person

adults in ALL SCHOOL SETTINGS

Has the person been within 6 feet of a person with confirmed or suspected COVID-19 for a cumulative total of 15 minutes or more over a 24-hour period?

If the answers to the questions above are both yes, the person is a close contact, regardless of whether the person was wearing a mask properly.

What should the close contact do?

If they are not up to date on vaccines

The close contact needs to <u>quarantine</u> for at least 5 days from the date of last close contact.

The close contact should monitor for symptoms, get tested at least 5 days after the close contact, and wear a well-fitting mask around others for 10 days from the date of the last close contact with someone with COVID-19. If they test positive, they should isolate.

Regardless of vaccination status, if a close contact develops symptoms, they should isolate, <u>get tested</u> immediately, and continue to isolate if they test positive.

If they are up to date on vaccines

If they have taken the full series of a COVID-19 vaccine and boosters as recommended, they are up to date.

The close contact does not need to quarantine.

The close contact should monitor for <u>symptoms</u>, <u>get tested</u> at least 5 days after the close contact, and wear a <u>well-fitting mask</u> around others for 10 days from the date of the last close contact with someone with COVID-19. If they test positive, they should isolate.

Regardless of vaccination status, if a close contact develops <u>symptoms</u>, they should <u>isolate</u>, <u>get tested</u> immediately, and continue to isolate if they test positive.

If they have had COVID-19 within the past 90 days, completed isolation, and recovered (regardless of vaccination status)

The close contact does not need to quarantine.

The close contact should monitor for <u>symptoms</u>, wear a <u>well-fitting mask</u> around others for 10 days, and speak with a healthcare professional about testing recommendations.

Regardless of vaccination status, if a close contact develops symptoms, they should isolate, <u>get tested</u> immediately, and continue to isolate if they test positive.
